## Functions & Applications

We shall start with the most obvious feature, the basic function of a time and attendance module is to allow employees to clock in and out to keep a record of their working hours.

Options must include RFID card readers.

RFID ID Card

## A simple way to Collection your Data!

Generating timesheets of employees becomes easier with automated time and attendance tracking software.

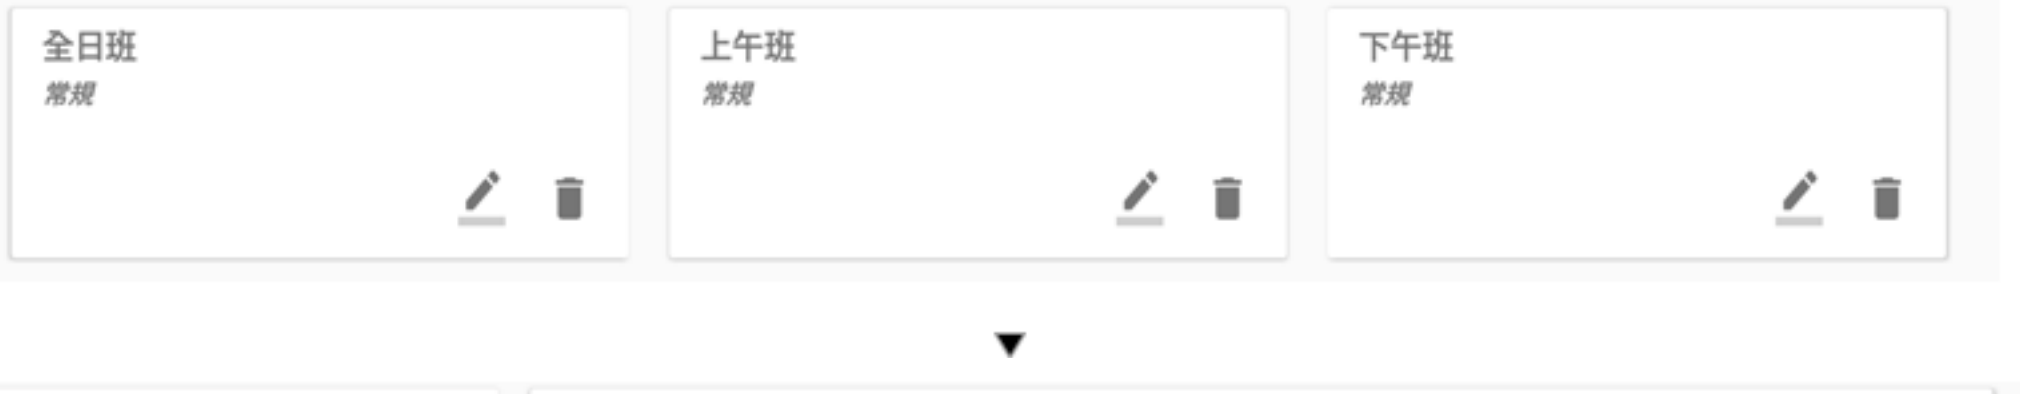

## Student Management

Student Management System Project for small level with full features add student, display student, update student, delete student, search student etc.

## Time Management

Making rectification in timesheet is most tedious task for HR's. Manually time tracking make it more difficult but with cloud based attendance software timesheet rectification becomes much easier..

時段	全日班	上午班	下午班
08:00 - 09:00	返校	上課	
09:00 - 16:30	上課	上課	
16:30 - 17:00	離校	離校	上課
17:00 - 18:00	離校		離校

## Manage Your Report

Your time and attendance software should be able to provide tailored reports and analytics using the system's data.

Expect your software to give you the information to various attendance-related reports, offering insights into hours worked, shift patterns, and so on with a view to constantly improving productivity..
